Summary

Computer Science Engineering undergraduate with hands-on experience in scripting, automation, AI-based systems, backend development, and testing fundamentals including unit testing, debugging, and validation. Skilled in Python, C++, JavaScript, and familiar with AI-driven workflows and quality assurance processes.

Education

Chandigarh University <i>B.E. in Computer Science Engineering</i>	2023 – Present CGPA: 9.05
Rajkamal Saraswati Vidya Mandir <i>Intermediate (CBSE)</i>	2020 – 2022 90.25%
Kids Garden Secondary School <i>Matriculation (CBSE)</i>	2019 – 2020 93%

Experience

Pinnacle Labs — C++ Programming Intern	May 2025 – Jul 2025
- Developed and optimized C++ modules for internal engineering tools. - Collaborated with developers to debug components and improve performance. - Performed unit testing to ensure reliability and correctness. - Documented technical workflows and suggested process improvements.	

Projects

Movie Recommendation System	Python — 2023
- Built content-based and collaborative filtering recommendation engine. - Automated data preprocessing and validated model accuracy. - Implemented feature extraction and data handling.	
Real-Time Emotion Detection — EmoSense	AI, TensorFlow — 2024
- Developed real-time emotion recognition using TensorFlow and OpenCV. - Tested and validated model predictions. - Optimized real-time processing workflow.	
Research Scholar Portal	JavaScript, MySQL — 2025
- Built backend portal for data management at Chandigarh University (UCRD). - Optimized database queries and backend logic. - Performed functionality testing.	

Core Skills

Programming: Python, C, C++, Java, JavaScript, MySQL

Testing & QA: Manual Testing, Debugging

Achievements

- NPTEL Silver Medalist — Cloud Computing
- Aptitude Test Winner — University Level
- Top 100 Teams — Smart India Hackathon (Internal Round)
